Geodesic flows of Weyl connections

Maciej P. Wojtkowski

University of Warmia and Mazury in Olsztyn, Poland
`wojtkowski@matman.uwm.edu.pl`

The talk is based on the joint work with Gabriela Tereszkiewicz.

Session: 16. Ergodic Theory and Dynamical Systems

We study examples of Weyl geodesic flows having Anosov subsystems as attractors/repellors. The respective connections have non-positive curvature.
